

ESSENTIAL SKILL PROGRAMS

PYTHON PROGRAMMING

Python is a general-purpose, object-oriented, high-level programming language. This program focuses on the installation of Python, the basic constructs of Python, the basics of databases, and the use of Python in web development. Python has an enormous degree of implicit data structures and these make it attractive for Web Application Development. This program also covers the deployment of a web application.

LIVE TRAINING
(30 HRS.)

SELF-PACED LEARNING
(30 HRS.)

CAPSTONE PROJECT
(45 HRS.)

Agenda

- Introduction to Python Programming
- Python Variables
- Data Structures
- Control Structures
- Functions in Python
- Introduction to Web development
- Basics of Database
- Web Application Development and Deployment
